Jan. 20, 1997

Dear Harold:

Just bought a copy of Wedge, which I have heard McKnight refer to. Is it a good book? Got it out of the bargain rack!

I enclose some stuff Janice got off American On Line. I had to chuckle at the comments on Curtis LeMay.

I was brousing thru the Sunday papers, and I found the enlcosed on Watergate, John Dean and "Silent Coup". Thought you would find it interesting.

I am cured of whatever I had. Hope my energy comes back a little soon.

Don't have much else to say. Note that Dennis Mac is going to be in Britain for 6 months. Wonder if he plans to make a talk on the JFK case while he is over there?

The cold weather seems to have broken a little. Which is good, I have alot of little things to do.

It is going to be interesting to see if Clinton can get any thing done in his second term. Looks like the Huns, excuse me, Republicans, are going to do their best to stop any progress. One thing that absolutely appals me is that water polution has not improved much. What a wonderful thing to spend money on, we would get cleaner water, more fish, etc. Some studies have shown that the poor get a surprisingly amount of food from fish they catch, if they feel it is from water that lets the fish be good to eat. I guess I am the perfect example that rich people can go to Key West for fish, but the poor go to the nearest lake or river. So, in many ways, the excessive water polution we have is a very racist or at least classist thing. Not often thought of that way, but very true.

I can spell better than this letter, I just don't care.In other words, I am not as dumb as my writing shows me to be!

Peace

Bill
